Ross Resigns As Minister of Lands and Mines

Will Be Succeeded By Former Speaker of House

After two weeks of uncertainty and speculation as to changes in the provincial cabinet it has at last been officially announced that Hon C C Ross, minister of mines and lands, has been asked for his resignation by Premier Aberhart, and that Mr Ross has tendered his resignation.

Mr Ross, however, has not given up his seat in the house. Immediately after announcing the resignation of Mr Ross Hon N E Tanner former speaker of the house, and the school teacher member for Cardston was sworn in as Minister of Mines and Lands to succeed Mr Ross.

Tilley Area School Trustees Are Elected

Will Meet in Court House At 1 O'clock p.m.

In the election of the Tilley East Area School Division no 5 the following School trustees were elected:

- Subdivision no 1 - H Demerest, Bindloss
- Subdivision no 2 - V Ohman, Attee
- Subdivision no 3 - C Olsen, Lidschlag
- Subdivision no 4 - C Glendie, Alderson
- Subdivision no 5 - R S. Furthur, Bowell

The first meeting of the Board of Trustees for Tilley division was held in the court house Medicine Hat, yesterday.

It has been estimated that in the British Isles at present it is reported that one in every four of the population is over 65 years of age.

In town Park, it is possible to find a large number of children who are suffering from the disease.

The first meeting of the Board of Trustees for Tilley division was held in the court house Medicine Hat, yesterday.

Pleasant Event by Local S. C. Group

Was Held in 100 F Hall On New Year's Eve

100 F Hall was fairly well filled for the social evening put on by the local Social Credit group on New Year's Eve. The contest which was followed by a supper, opened with a song. In cards Mrs C. Stroh, Miss May Martin and Mrs L. Henderson won the prizes. During the evening the drawing was made for the fancy tea table, which was won by Mrs Wheeler.

Redcliff Young Man Married Last Thursday

Strobel-Whitfield

A quiet wedding took place at 2 p.m. Dec 31st, at the Fifth Avenue mansion, when Evelyn, the second daughter of Mr and Mrs T H Whitfield of Calgary, became the bride of Edward Strobel an employee of the Dominion Glass and Ice Co.

The bride wore a tailored suit of navy blue crepe with white accessories and carried a bouquet of white flowers.

The wedding was attended by Mr and Mrs J W Balch, Mr and Mrs J W Balch, Mr and Mrs J W Balch.

The King to be Patron of the Scouts

KING GEORGE VI

has indicated his readiness to become, like his father, the Patron of the Boy Scouts of the Empire.

A. Paterson Elected As Legion Secretary

G. Gogood Resigned Owing To Ill Health

At an executive meeting of the local Legion held last Tuesday Mr A. Paterson was appointed secretary for a number of years.

Mr A. Gogood who has been secretary for a number of years was forced to resign the position owing to ill health which has seriously affected his eyesight.

We are informed that at a Social Credit meeting of the Legislature made the statement that the government was willing to finance any industry that would open up business in the province.

A man in the audience asked the question: "How in the government help to finance an industry when it can't pay its own debts?" According to the answer to the question.

LOOK AT YOUR LABELED

ROYAL BROTHERS PATHS NOW PART

Probably never again will there be a picture taken such as the one above, showing together three of the royal brothers of the British Royal Family. Left to right: Former King Edward, the Duke of Gloucester and the new King, George VI, as they appeared at the races recently.

1937

At the beginning of a new year it is customary for business firms as well as homes, married along business lines, to review stock of the past year and lay plans for improvements for the coming year.

When one looks back over the year so far as Redcliff is concerned, and sees carefully into conditions which have existed for the past few years, it is clear which the whole world has been laboring under a most serious depression, one is bound to come to the conclusion that Redcliff has been exceedingly fortunate and is one of the outstanding centres of the west as far as unemployment and economic conditions are concerned.

During those hard times there are few if any towns where of Redcliff which have had so much unemployment relief to and out than this town.

Throughout the whole past season the Dominion Glass and Ice Co. has worked day and night, giving employment to from 125 to 200 men and women practically all the time. The three brick yards and the coal mine have furnished employment up to the usual activities during better times, and the P. & N. has increased its staff during the past few years.

Taking all these into consideration we figure out that for this biggest part of the year there is a payroll in town of approximately \$25,000 a month.

With this payroll Redcliff would be in a flourishing condition provided, of course, that there were earners and business.

There has been interest in the welfare of the town and to see it and worked together for its development and activities.

If all worked together for the welfare of the town during 1937 it will see a big improvement at the end of the year.

Legion Auxiliary Elects New Officers

At Annual Meeting Held on Tuesday, Jan 6th

At the general meeting of the local Auxiliary to the local Legion held last Tuesday, the following officers were elected:

President - Mrs Ippard
 Vice Pres - Mrs Phillips
 1st Vice - Mrs McDermott
 Sec - Mrs J Kitchin
 Treas - Mrs Paterson
 Ex Com - Mrs Podesta, Mrs Goss, Mrs Hurbert, Mrs McDermott, Mrs Davies and Mrs Alderson

Social Convener - Mrs Hurbert
 Standard Bx - Mrs Phillips
 Auditors - Mrs Paterson, and Mrs Hope
 Ex Com - Mrs McDermott, and Mrs Podesta

Say Farmers to Sow Rust-Resisting Wheat

Thatcher Will Be The Most Widely Distributed

It is now reported that many farmers throughout the west will be sowing large quantities of approved rust resisting wheat in coming season.

Of the new wheat, Thatcher, Aprax and Reown that are practically completely immune from stem rust, Thatcher is most widely distributed.

Miss Todd left last Saturday for the Sarnia ranch near Walsh.

Mr and Mrs W King spent the holiday season in Calgary visiting friends.

The thermometer registered 1 below yesterday morning but now much warmer. A chin is predicted shortly.

Miss Carlson, of Alderson, who recently underwent an operation, is now recovering nicely here she is visiting with Mrs Wheeler.

Mrs W Cox, of Calgary, spent the New Years season here visiting her parents Mr and Mrs J Podesta. Her little niece, Grace, accompanied Mrs Cox back to Calgary.

Three children of Mr and Mrs W. Taylor of Calgary were "frozen" when their home was struck by the ground last night. The children were 2 and 1 years old. Mrs Taylor escaped by her nightgown. The Mr. Taylor had just gone to work.

ST. MARY'S CHURCH Mass will be celebrated on the 3rd Sunday of each month at 10 a.m.

ST. AMBROSE CHURCH Rev H. S. Han nett, Vicar Union, 1st, 2nd, 3rd Sundays at 9:00 a.m. and Sunday at 11 a.m. Sunday School at 2:00 a.m. Wednesday at 7:30 p.m.

ORDON MEMORIAL UNITED CHURCH Rev H. V. Elliott, Pastor 10 a.m. Church School 10 a.m. Morning Worship 10:30 a.m. Evening Worship 7:30 p.m.

Who is now on his way back to Canada for the opening of parliament, after a long holiday, is the man who visited most important sections of the British Empire.

HON R B BENNETT

PLUG SMOKING TOBACCO

Power On The Farm

No industry under the sun has greater, more numerous and more varied problems besetting it than the agriculture. Nowhere, perhaps, are these problems more difficult of solution than in Western Canada, because of the immense range of the country and wide variation in seasonal and soil conditions, and by no means least of these problems is the power question for the farm.

A few years ago the introduction and popularization of large scale power machinery farm use, the tractor, gave rise to a highly controversial topic usually designated: "The Horse versus the Tractor." Many farmers aligned themselves in one of two camps, those who favored horses as the motive power on the farm and those who regarded the tractor as the one and only form of power worth while for field operations.

The controversy at times became tinged with bitterness and threatened to become an open feud. Cautious—verbal one, of course, were wielded with great vigor and even pointed, university authorities and editors of farm papers were accused of trucking to the one side or the other.

For some years it looked as though the advocates of power machinery were in the ascendancy and it was even freely predicted that the time was not far off when the horse would be as extinct as the proverbial dodo, save perhaps for a few specimens that would be preserved in zoological gardens for the benefit of the curious and the student of natural history.

After awhile the question appeared to have tapered as a public controversial issue within the agricultural domain. The difference gradually disappeared and assumed a more moderate complexion.

Recent, which appeared to be tottering on her knees whenever the issue was raised, re-assumed her sway, partly because, like most other things, it gradually dawned on the general consciousness that there were two ideas in the question and that neither one nor the other was wholly right or entirely wrong. Changing conditions also, which have a habit of occurring in a non-stop way, revealed that what might be true under certain conditions at a given time, was not appropriate under the same, or other conditions, at some other time. In agriculture, as in most other spheres there is no law of the Medes and Persians.

And at this juncture, it might not be inappropriate to remark that this is precisely the reason why farming is a hazardous enterprise and requires in addition to a leaning of luck, a considerable amount of energy, ability and good judgment, to ensure a sporting chance of success.

But to "return to our mittens," it must be generally recognized today that both the horse and the tractor have their place in the agricultural scheme in the prairie provinces and both are likely to have a useful purpose to serve for many years to come.

This has recently been emphasized by A. E. Hardy, Professor of Agricultural Engineering of the University of Saskatchewan, acknowledged as one of the foremost authorities in the west on the subject, in a series of lectures to farmers.

Professor Hardy pointed out that under certain soil conditions tractors which are impossible with horses can be achieved by power driven machinery and vice versa. He also pointed out that in some sections of the country where soil and other conditions are different farmers would find it almost impossible to carry on with horses at the present time.

There are other considerations which must necessarily be a guide to the farmer in determining what type of power is best suited to his particular purposes and these include his own economic circumstances. There are individual farmers and even some sections of the country where a combination of the two forms of power may yield the best results.

Then, too, the attitude of the individual farmer and the type of help he is able to secure in his consideration. There are men who can get much better results from a team of horses than it would be possible for them to do with a tractor while, on the contrary, farmers with a mechanical turn of mind, under the same conditions, are able to achieve much more with a tractor than with horse power and the economy, likewise, there are many farmers who could not get results with power machinery, whose men siding them on the farm have very little liking for livestock but can achieve wonders with power machinery.

So that the question of the type of power to use on the farm is one which can only be solved satisfactorily by the individual farmer, taking into consideration the character and nature of the topography of his land, the size of his holdings, his own economic circumstances and his own aptitude, predilections and prejudices as well as those of the nature of help available.

In this respect the problem is like that of many others which have been or are the subject of heated controversy. The answer does not lie in any dogmatic ruling but in the circumstances, operating conditions and aptitude of the individual.

It is said that one can bite slightly
times as hard with real teeth as with
false teeth.

Every six minutes there is an accidental
death in the United States.

OFFICE MEN

For the purpose of the office men, the
Shaw Schools Limited, Toronto, Ontario,
Canada, has a special course for office
men, which is a most valuable and
practical course, and is the only one
of its kind in the world.

SHAW SCHOOLS LIMITED
TORONTO, ONTARIO

Largely Private Dwelling
The largest and most magnificent
private dwelling in the world is said
to be the Palazzo Doria in Rome,
now over 600 years old. As many as
thousand people have lived over
its roof at one time.

Proud Mother—And what do you
think of our little Frank as a
planist?

Professor—Well, he had a nice way
of closing the lid.

Maybe married men do have bet-
ter halves, but most husbands have
better quarters.

Nothing—he got the job.

New Style Locomotive

Is Designed To Compete With The
Diesel-Electric

Borrowing an idea from Barney
Offit's steam engine car of 1899,
a new railroad steam locomotive, de-
signed to compete with the Diesel-
electric running the new electric
lines, was announced at the
annual meeting of the American
Society of Mechanical Engineers.
The new engine is steam-electric—
the "Steamotive." Its steam
runs an electric turbine so quickly
drives the wheels.

Offit's engine made quick, light-
weight steam by exposing a big area
of heating pipes to fire. The new
steamotive does the same. It is a
midsize with giant steam power. It
carries a quarter mile of steam pipe
all in a space the size of two office
desks.

This double-deck area encloses the
entire steam and heating plant. An
oil burner furnishes heat.

Two of these steamotives are now
under construction. The announce-
ment says their horsepower will be
2,500 each.

This rates the newest "baby" of
steam power at its birth on a par
with the best done so far in Diesel-
electric energy. It is still a steam
engine, but it is a steam engine
under the most powerful of all
engines, the steam coil engine of
6,000 horsepower. It is under the
5,000-horsepower electric locomotive
which takes their "juice" from
wire or third rail.

But the engineering society's an-
nouncement states the midsize, by
being enlarged, can be made in fea-
sible sizes of 10,000 horsepower per
boiler.

Diesel-electric at present runs from
800 to 1,500 horsepower per unit and
is as small enough as many as four
units have been hooked together on
one locomotive.

The "Steamotive" engine's power
comes mainly from the fact its steam
is produced at pressures of 1,500
pounds, while the Diesel engine's
of this steam does the work of a lot
of the lower pressure steam ordinarily
used in locomotives.

The water is driven at high speed
through the heating pipes in order
to prevent the danger of explosion
of the super-pressure steam.

Turkeys For British Market

Largest Shipments Will Be From The
Prairie Provinces

Present prospects are that ap-
proximately 3,000,000 pounds of tur-
keys will be exported from Canada
to the British Isles in 1932 for
Christmas, most of which will be
from the three Prairie Provinces—
Manitoba, Saskatchewan and Alberta.
The export of Canadian turkeys
to the British market for the
Christmas trade was made in 1932,
when well over 1,000,000 pounds of
Chilled and frozen birds found ready
buyers because of their recognized
flavor and quality. All of the tur-
keys exported to the British market
are graded, packed and inspected ac-
cording to Dominion Government stand-
ards before being shipped.

Turkey raising has developed into
quite a substantial industry in Can-
ada in recent years. Of this year's
export, most of it is expected
Manitoba will supply the largest per-
centage. The shipments for export
will go forward both chilled and frozen.

While the principal development in
turkey raising in the past few years
has been in Western Canada, the in-
dustry has been making considerable
progress in Eastern Canada, particu-
larly in Ontario and Quebec, where
artificial hatching and rearing is car-
ried on successfully. Most of the pro-
duction, however, comes from
farmers engaged in mixed
farming, who raise comparatively
small numbers.

Foreign Capital In U.S.

Survey Indicates Foreign Holdings To
Be Approximately Seven
Billion Dollars

Publishing for the first time the
details of foreign capital movements
which President Roosevelt re-
cently expressed concern, the United
States treasury disclosed a \$2,311-
600,000 net inflow of funds from
abroad between Jan. 1, 1930, and
last Sept. 30.

This influx, representing the ex-
cess of funds coming into the coun-
try over those going out, came almost
entirely from Great Britain, Switzerland,
France, the Netherlands and Canada.
The Canadian figures are reported
in the treasury survey indicated foreign
holdings in this country approxi-
mately \$7,000,000,000—behind the
highest in history on Sept. 30.

"There goes a fellow who chased
around for years, trying to land a
political job."

"Well, what does he do now?"

"Nothing—he got the job."

Bill Voted Down

House of Lords Rejects Measure To
Permit Medical Men To Kill
Incurable Patients

The house of lords today voted
against a measure to permit medical
men to kill incurable patients
suffering from agonizing ailments.

Under the weight of opposition
from such persons as Lord Dawson
of Penryn, the king's physician, and
the Archbishop of Canterbury, the
measure was rejected by a vote of
33 to 14.

Despite present defeat, the bill's
sponsor, Lord Ponsonby, predicted
eventual passage of a revised mea-
sure to permit "euthanasia" (easy
death).

"I am certain," he said, "that the
time will come when parliament will
have to regulate the matter and I am
certain that a measure of this kind
will be accepted some day."

"I am afraid the situation between
priests and doctors will be a
difficult one to deal with, but I
think that the time will come when
priests and doctors will have to
work together."

In strong opposition to the bill,
Lord Dawson said sentiment was
growing that the act of dying should
be more gentle, but that doctors
were also coming to realize that a
patient's desire for death was more
impulsive.

The Archbishop of Canterbury
said "I cannot but think it is better
to have this difficult and delicate
question left to the hands of the
profession rather than to draw into
the open and regulate it by legal
provisions."

"In this matter I would trust the
judgment and honor of the medical
profession."

Vancouver, B.C., a Roman Cath-
olic, said "People of all creeds have
as a whole accepted the tradition
that the Almighty has made man in
his own image and to make himself
self alone the power to determine
the moment when life shall become
extinct."

Seats For Coronation

Large Number Of Applications For
Seats To View The Procession

A large number of applications for
seats from which to view the coro-
nation procession in London have
been received by Hon. Vincent
Massey, Canadian high commissioner.
It has been decided to charge a
subscription list for seats at the Jan. 1,
1937, coronation, and to this effect
was made the office of the prime
minister.

Seats are being erected along the
procession route by the United King-
dom government and certain sections
have been allotted at cost to high
commissioners of the various do-
minions. As it is expected the de-
mand may exceed the supply it has
been decided to accept all applications
for seats at the disposal of the
Canadian high commissioner must be
made before the end of the year.

It was further announced applica-
tions for these seats must be made
individually and that none will be
accepted if made through a church,
agency, institution, booking office or
business firm.

Canadians wishing to obtain reser-
vations in the sections allocated to
the Canadian high commissioner will
apply direct to his secretary at Can-
ada House in London.

SELECTED RECIPES

GRAHAM GEMS

- 1 cup flour
- 4 tablespoons brown sugar
- 6 leaspoon salt
- 4 leaspoons Magic Baking Powder
- 1 cup granulated sugar
- 1 egg
- 1 egg
- 4 leaspoons butter, melted

Combine flour, salt, sugar,
leaspoon salt and baking powder in
a bowl. Add milk, egg and melted
butter. Mix well. Bake 15 min-
utes at 325 degrees F. about 30 min-
utes.

Just An Imaginary Line

International Boundary Moves North
To Canadian Border

The Canadian-American boundary
at International Falls, Minnesota, is
just an imaginary line to a band
of horses as no Canadian officials
are forced to tolerate their "un-
insured entry" into the United States.

The Canadian leaves his car on
Haley River island but selected the
American shore for wood and feed
supplies. American property on the
island is being damaged, and the
complainting about the damage, asked
that the horses be "deported."

"Deportation" means send mail
spring, however, because the state
game and fish department ruled the
horses be deported.

Trans-Canada Aviation

Passenger And Mail Service To Be
In Operation In Near Future

Trans-Canada passenger and air
mail service will be in operation by
1938 or 1939 at the latest. Transport
Minister Howe told members of a
Minister House club.

This service will be linked with
trans-Atlantic service which the
minister said is expected to be
completed in two years.

He said the Dominion government
had made extensive preparations for
this service. Landing fields have
been established between Montreal
and Vancouver at distances 50 miles
apart. These fields will be ready for
traffic next summer, he said.

The government plans to furnish
landing fields, radio beacons and
weather reports. "We will look to
port, and stated his case to the Com-
mander. In short order the ship was
steaming "out," down the river, and
within six hours we were at the bed-
side of the sick child.

And so, whenever at festive hours
the hosts are bidden, the following
ways be a particular toast made by
one Canadian in tribute to a service
which has been made, the meaning
of the word service. And the toast
will be "The British Navy."

Memorial To Young Airman

Father Takes Heavy Stone From
England To France

One of the women who care for the
English war cemetery at Rouen,
France, relates that a father has
gone to heroic lengths to erect a
memorial to the young airman, his
son, who died battling in the sky
during the World War. The mem-
orial is a heavy unpolished stone
from Devonshire, England. It was
pushed aboard a barge by the father
from his village in Devon to the
coast. A ship carried it to the
French coast, and a barge took it to
the river to Rouen. From there the
father set out with his back-
pack, and he carried the stone all
the way to the cemetery. The woman
caretaker showed him the grave and
he laid the stone on it.

C.N.R. Staff Changes

Several New Appointments An-
nounced By W. A. Kingsland

Appointments of J. P. Johnson,
formerly superintendent of the Cal-
gary division of the Canadian Na-
tional Railways as general super-
intendent of the northern Ontario
division with headquarters at King-
ston, and J. P. Johnson, formerly
vice-president of the central
region.

Mr. Johnson, whose appointment
became effective Dec. 3, 1936, was
transferred to Vancouver as general
superintendent of the British Colum-
bia district.

Mr. Johnson, native of Castle Bar,
Canada, his railway career with
the old Grand Trunk system as an
operator at Warwick, Que.

Mr. Johnson, superintendent of
the Lewis division, replacing
Mr. Wright, at present on leave of
absence.

J. H. Pakenham, assistant super-
intendent of Cochrane division, to be
assistant superintendent of Laur-
entian division, relieving J. A. Trudel,
at present on sick leave.

J. L. Ashman, chief dispatcher at
Cochrane, to be acting assistant
superintendent at Parent, Que., re-
placing T. H. Pakenham.

Reduced Radium Price

Discovery of rich Canadian radium
deposits in the Great Bear Lake
districts have had the beneficial ef-
fect of reducing the price of radium
to \$21,000 a gram in the price of
radium on world markets, stated Dr.
J. E. Gray, director of the Radium
Institute of the University of Montreal.

Ancient Greek has been named by
philologists to be the nearest perfect
language.

Ninety-three per cent. of the
world's \$4,000,000 telephones are in-
ter-comparable.

The planet Mercury has a year
only 88 days long.
